

P Phosphorus: Mononuclear Compounds with Hydrogen

By Joachim Wagner

Springer. Paperback. Condition: New. 326 pages. Dimensions: 10.0in. x 7.0in. x 0.7in. This volume C 1 is the first supplement volume to Phosphor C which was published in 1965 and covers the compounds of phosphorus. Starting with the binary species formed between phosphorus and hydrogen, the present volume deals with the neutral mononuclear compounds PH through PH₃; the ions featuring the same stoichiometric composition are covered in separate sections. PH and PH₂ are the major initial gaseous decomposition products of PH₃ and, thus, also 2 J intermediates in many of its gas-phase reactions. Both molecules and their ions have been thoroughly investigated by a variety of modern, high-resolution spectroscopic methods during the last three decades. The coverage of their physical, and mostly molecular, properties represents the largest part of the first two chapters (PH and ions pp. 2 to 47; PH₂ and ions pp. 47 2 to 111). PH is the only compound described in this volume which is thermally stable under normal J conditions. It is the phosphorus analog of ammonia, but exhibits, however, a quite different chemical behavior towards most elements and compounds. The majority of its physical, and in particular spectroscopic, properties have been determined...

Reviews

It is a single of my personal favorite ebook. Better than never, though I am quite late in starting reading this one. I am effortlessly will get a satisfaction of reading a published ebook.

-- Ms. Lavada Krajcik

Comprehensive guideline for book lovers. It can be filled with knowledge and wisdom I realized this publication from my dad and I suggested this pdf to find out.

-- Ted Schumm
