You can use the toolbox to perform cash flow modeling and yield curve fitting analysis, compute prices and sensitivities, view price evolutions, and perform hedging analyses using common equity and fixed-income modeling methods. The toolbox lets you create new financial instrument types and fit yield curves to market data using parametric fitting models and bootstrapping. Financial Instruments Toolbox includes functions for pricing and analyzing fixed-income and equity instruments. Fixed-income modeling tools let you calculate price, yield, spread, and sensitivity values for several types of securities and derivatives, including mortgage-backed securities, treasury bills, bonds, bonds with embedded options, swaps, caps, floors, and floating-rate notes. For equities, the toolbox lets you compute price, implied volatility, and greek values of vanilla equity options and of several exotic equity derivatives such as Bermuda, basket, barrier, digital, and rainbow options.
