This Work-Related Lung Disease (WoRLD) Surveillance Report is the seventh in a series of occupational respiratory disease surveillance reports produced by the National Institute for Occupational Safety and Health (NIOSH). It presents summary tables and figures of occupational respiratory disease surveillance data focusing on various occupationally-relevant respiratory diseases, including pneumoconioses, occupational asthma and other airways diseases, and several other respiratory conditions. For many of these diseases, selected data on related exposures are also presented. The 2007 WoRLD Surveillance Report consists of two volumes. Volume I has three major sections: (1) a section that provides data highlights and data usage limitations; (2) a section comprised of 17 subsections, each concerning a major disease category and (where available) related occupational exposures, and one subsection concerning smoking status; and (3) a section of appendices that provide descriptions of data sources, methods, and other supplementary information. Volume II has nine sections presenting data on respiratory conditions by major industrial sector, as defined by the National Occupational Research Agenda (NORA). Similar to the 2002 WoRLD Surveillance Report, this report includes data on hypersensitivity pneumonitis, asthma,...
