Benjamin Franklin Press. Paperback. Book Condition: New. Paperback. 252 pages. Dimensions: 9.0in. x 6.0in. x 0.7in. Second in a series of six new books for a Darwin Anniversary Book Cycle, *Measuring Evolution: A Users Guide to the Health and Wealth of Nations* tells the inspiring story of the development, and provides a guide to the use, of the Global Sounding. This is a new instrument for measuring our local, national, and planetary health and well-being on 15 basic indicators of evolution. Of widespread prospective interest is the fact that, for the first time, this new measure bridges what both progressive scientists and progressive religious leaders increasingly view as a socially, economically, politically, and morally disastrous gap between science and spirituality. With hundreds of studies of evolution by natural, social and systems scientists behind it, the Global Sounding has been designed to provide a relatively simple new way of measuring the impact of our human actions, or inactions, on the range from cosmic, chemical, and biological evolution, through the evolution of the brain, into the spread of cultural evolution through personal, social, economic, political, educational, and technological into moral and spiritual evolution, capped by the evolution of consciousness and personal and social action to change our world for the better. The name for the new measure comes from Darwins famous voyage of the Beagle-the ship originally commissioned to circle the world to obtain soundings indicating peaceful harbors and safe channels for navigation. The book is animated by colorful, engaging, and often humorous stories to illustrate how the new measure can be put to use by progressives during the customary behind-scenes battles with advocates for the status quo or regressives in key decision-making situations that determine whether we move ahead, are checked in place, or shoved backward in evolution. Along with illustrative test...
