

## The Complete Beginner's Guide to Genealogy, the Internet, and Your Genealogy Computer Program

By Clifford, Karen

GR, 2001. Soft cover. Condition: New. No Jacket. The modern world of genealogy combines the traditional methods of research with the awesome power of computers and the Internet, a combination so powerful that it has transformed the way we do genealogy. The purpose of this book, therefore, is to train the researcher in this new methodology, tying the fundamentals of genealogical research to the infrastructure of computers and web sites. In other words, it is a manual for modern genealogy--designed for the beginner but useful even to the most seasoned researcher. With our growing reliance on electronic databases, computer programs, and Internet resources, genealogical research, for all practical purposes, will never be the same. And yet in many respects it will be the same, for the principles of sound genealogical research are Immutable, and this book shows how to combine traditional research methods in the National Archives, the LDS Family History Library, and other major resource centers with today's technology; how to conduct research in courthouse records, censuses, and vital records using techniques unheard of just a decade ago. It shows you how to get started in your family history research; how to organize your family papers; how to enter...
