EFFECTIVE PROGRAM EVALUATION

Solution Tree, United States, 2011. Paperback. Book Condition: New. 2nd. 274 x 213 mm. Language: English . Brand New Book. Educators and administrators are increasingly coming to realize the importance of making decisions based on reliable, accurate data. It is not always clear how to gather such data, however, or what to do with the data once they have been collected. Effective Program Evaluation provides a clear and easily implemented blueprint for evaluating academic programs, practices, and strategies. This blueprint will help answer such questions as: Is our math curriculum adequately targeting higher-order thinking skills? What steps could we take to ensure that our response to intervention (RTI) program meets the needs of all students? How well does our classroom instruction in social studies align with standards and learning goals? Authors Mardale Dunsworth and Dawn Billings provide examples and clear directions to guide the reader through a five-step process for systematically gathering, objectively evaluating, and constructively acting on data. The following five steps form the core of a program evaluation cycle: 1.Creating and completing a program evaluation blueprint to define the purpose and scope of the evaluation 2.Gathering data needed to assess a program s effectiveness 3.Analyzing the data in order to identify a program s strengths and weaknesses 4.Using the results of the program evaluation to plan next steps 5.Communicating results to stakeholders in order to build community involvement and support This Essentials for Principals guide provides a framework for transparent, accurate evaluation of current practices and inclusive planning. It includes a step-by-step walkthrough of the program evaluation cycle and an appendix that explains vital concepts and vocabulary in accessible language.
