ASP.NET 2.0 Cookbook (Paperback)

By Michael A. Kittel, Geoffrey T. Leblond

O'Reilly Media, Inc, USA, United States, 2005. Paperback. Condition: New. 2nd Revised edition. Language: English . Brand New Book. Completely revised for 2.0, this new edition of the best-selling Cookbook has everything you need to go from beginning to advanced Windows-based web site development using Microsoft's popular Visual Studio 2005 and 2.0 developer tools. Written for the impatient professional, 2.0 Cookbook contains more than 125 recipes for solving common and not-so-common problems you are likely to encounter when building -based web applications. The recipes in this book, which run the gamut from simple coding techniques to more comprehensive development strategies, are presented in the popular Problem-Solution-Discussion format of the O'Reilly Cookbook series. As with the first edition, every solution is coded in both C# and Visual Basic 2005. Among the additions and revisions to this new edition are: three new chapters, including 25 new recipes for Master and Content pages, Personalization using Profiles and Themes, Custom Web Parts, and more; and new code for every solution, rewritten to take advantage of features and techniques new to 2.0 and available for download. The 2.0 Cookbook continues to provide the most comprehensive coverage you'll find anywhere of: tabular...

Reviews

An incredibly amazing ebook with perfect and lucid answers. It is written in basic terms and never difficult to understand. It's been written in an exceptionally basic way and it is only right after I finished reading this ebook in which it in fact modified me, affected the way I really believe.

-- Beverly Hoppe

Extremely helpful for all class of individuals. Better than never, though I am quite late in starting reading this one. I realized this publication from my dad and he suggested this ebook to discover.
