World Bank Publications, United States, 2012. Paperback. Condition: New. New. Language: English . Brand New Book. In their efforts to increase the share of renewable in electricity grids to reducing emissions or increasing energy diversity, developed and developing countries are finding that a considerable scale-up of investments in transmission infrastructures will be necessary to achieve their goals. Renewable energy resources such as wind, solar, and hydro power, tend to be sited far from existing electricity grids and consumption centers. Achieving desired supply levels from these sources requires that networks be expanded to reach many sites and to ensuring the different supply variation patterns of renewable are combined with existing sources in the grid to ensure the constantly varying demand for electricity is always met. Expanding networks will be crucial to achieve renewable energy objectives efficiency and effectively. Efficiency is important to ensure renewable energy goals are achieved at the lowest cost while considering needed investment in transmission. Besides the cost of transmission, which is often worth, transmission needs be planned and built in such a way that the many sites being taped are connected in a timely fashion. The challenges of ensuring efficiency and efficacy in developing transmission for renewable become surmountable if the right planning and regulatory framework for expanding transmission are put in place. This report reviews emerging approaches being undertaken by transmission utilities and regulators to solve to cope with these challenges of expanding transmission for renewable energy scale-up. Proactively planning and regulating transmission networks are emerging as the premier approach to ensure that transmission networks are expanded efficiently and effectively. Linking planning with clear and stable cost-recovery regulation can also help bringing the private sector to complement the considerable investment needs in transmission. Based on the evolving experience and on established theory and practice on transmission...
