Reproductive Health Profile
of Women in Biosphere
Reserve area

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Environmental factors affect human health in important ways, both positive and negative. All humans are exposed to environmental factors through the air we inhale, through the water we drink and through contact with different substances (WHO, 2006). Reproductive health affects and is affected by broader context of people's lives, including their economic circumstances, education, employment, living conditions, family environment, social relationships, and the traditional & legal structures within which they live (Institute of Medicine,...
