

An Elementary Course in the Integral Calculus

By Daniel Alexander Murray

BiblioLife. Paperback. Book Condition: New. This item is printed on demand. Paperback. 304 pages. Dimensions: 8.0in. x 5.0in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 edition. Excerpt: . . . Note 3. On putting a b c, the volume of a sphere of radius a is found to be $\frac{4}{3}\pi a^3$. Ex. 2. Find the volume of the ellipsoid given in Ex. 1: (a) by taking the infinitesimal slice at right angles to OY; (6) by taking it at right angles to OZ. Ex. 3. Determine the volume of a sphere of radius a by the method of this article. Ex. 4. Find the volume bounded by the hyperbolic paraboloid $z = \frac{1}{2}xy$ the xy-plane and the planes $x = a$, $x = A$, $y = b$, $y = B$. Ex. 5. Find the volume of the wedge cut from the cylinder $x^2 + y^2 = a^2$ by the plane $z = 0$, and the part of the plane $z = x \tan \alpha$ for which z is positive. Ex. 6. Find the entire volume bounded by the surface Ex. 7. The center of a sphere of...
