

Gravitational Collapse of Stars & A Universe Dominated by Dark Energy

By Rudra, Prabir

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The Presence of Dark Energy is Weakening Gravitational Collapse | For a stronger gravity, collapsing procedure generally results in a black hole, whereas for a relatively weaker gravity, naked singularity becomes the ultimate fate of the gravitational collapse. Presence of dark energy weakens a collapsing procedure up to a considerable extent. In the quest of finding a suitable model for the present universe, we see that Modified Chaplygin gas in Brane gravity is a deserving combination. Generalized cosmic Chaplygin gas, although presents a more universal outlook due to being less constrained, yet it is a relatively weaker form of dark energy compared to Modified Chaplygin gas. | Format: Paperback | Language/Sprache: english | 236 pp.

Reviews

Thorough manual for ebook fans. it had been writtern quite properly and valuable. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Dr. Catherine Wehner

Absolutely among the best book I have possibly go through. I have go through and that i am certain that i am going to gonna read through once again again in the future. I am just delighted to tell you that this is basically the finest book i have got go through within my personal existence and could be he finest book for ever.
