Periscopio, Greece, 2010. Paperback. Book Condition: New. 4th Revised edition. 297 x 210 mm. Language: N/A. Brand New Book. We are glad to introduce to you the third volume of Periscopio s series of modelling and historical reference publications under the title PHOTO GALLERY PROFILES . This volume covers in 140 pages the most successful versions of an aeroplane that represents a milestone in aviation history, the F/RF-4E Phantom, II. The Phantom, a true legend of the skies, has just celebrated its 50th anniversary but still is a very active airplane in first line service with some of the most advanced air forces of the western world such as the German Luftwaffe and the Israeli Air Force. The book thoroughly describes the development of this machine from the 1958 prototype to the F-4E that was the ultimate fighter bomber version, and the RF-4E, one of the best photo reconnaissance platforms ever produced. There is a special section on the F/RF-4E users describing facts and figures of its operators around the world with tens of previously unpublished photos featuring interesting aspects of their career. Particular attention is given to the Phantom colours describing all schemes and variations from the Vietnam War era camouflage to the modern low visibility schemes with 30 colour profiles and 4 view scale linear drawings by R. Caruana complementing this section. The main strongpoint of this volume though is once more the photo walkaround section. More than 400 full colour photos cover every aspect of the aircraft, its systems, its power plant and its armament. Plenty of cockpit detail and open access panel photos will definitely fulfil the most extreme super detailer requirements. All differences between the variants are comprehensively presented as well as many late life modifications and updates. The captions are rich in technical details...
