Createspace, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Lieutenant George Underhill, commanding H.M. surveying ship Albatross, had an unpleasant shock when he turned out of his bunk at daybreak one morning. The barometer stood at 29.41 . For two or three days the vessel had encountered dirty weather, but there had been signs of improvement when he turned in, and it was decidedly disconcerting to find that the glass had fallen. His vessel was a small one, and he was a little uneasy at the prospect of being caught by a cyclone while in the imperfectly-charted waters of the Solomon Islands. He was approaching the eastern shore of Ysabel Island, whose steep cliffs were covered with a lurid bank of cloud. If the shore was like those of the other islands of the group, it would be, he knew, a maze of bays, islets, barrier reefs, and intricate channels amid which, even in calm weather, a vessel would run a considerable risk of grounding, a risk that would be multiplied in a storm. Anxiously noting the weather signs, Underhill hoped that he might reach a safe anchorage before the threatening cyclone burst upon him. As is the way with cyclones, it smote the vessel almost without warning. A howling squall tore out of the east, catching the ship nearly abeam, and making her shudder; then, after a brief lull, came another and even a fiercer blast, and in a few minutes the wind increased to a roaring hurricane, enveloping the ship in a mist of driving rain that half choked the officers and crew as they crouched under the lee of the bulwarks and the deckhouse.
