GRIN Verlag Mai 2009, 2009. Taschenbuch. Book Condition: Neu. 210x148x8 mm. This item is printed on demand - Print on Demand Neuware - Master's Thesis from the year 2008 in the subject Environmental Sciences, grade: 100%, Brandenburg Technical University Cottbus, course: Environmental and Resource Management, language: English, comment: Brandenburgische Technische Universität Cottbus Awarded as the Best Master Thesis in 2008 for the Faculty 4: Environmental Sciences and Process Engineering. VDI (Verein Deutsche Ingenieure) Price received from the National Association of German Engineers Region: Brandenburg-Berlin , abstract: In the light of availability concerns and environmental implications of fossil fuels, attached with the remarkable rise in the price of oil during the past several years; biofuels are getting a significant increase in interest worldwide from governments, private investors, farmers and the public in general. Nevertheless, the use of cropland for biofuels had become a very controversial topic. On one hand, promoters state that biofuels represent opportunities to increase the energy security and to generate environmental and social benefits (through greenhouse gases emissions reductions and poverty alleviation through rural development respectively). On the other hand, topics such as the effects on food prices and availability, soil fertility and erosion, competition for scarce land and water resources and biodiversity loss are also widely discussed as important concerns related to further development of bioenergy. Notwithstanding this, several developing countries around the world are turning into the biofuels direction to satisfy the demand of developed countries while contributing to their economical growth and/or diversifying their current options of energetic arrangements. For Latin America and the Caribbean (LAC), a geographical area with privileged natural resources; home-grown energy crops emerge as an appealing possibility, especially given the example of Brazil, a historical leader in ethanol production. After assessing some core elements of the biofuel's debate, the evidence seems...
