

Superstition and Science, 1450-1750: Mystics, sceptics, truth-seekers and charlatans (Paperback)

By Derek Wilson

Little, Brown Book Group, United Kingdom, 2017. Paperback. Condition: New. Language: English . Brand New Book. A dazzling chronicle, a bracing challenge to modernity's smug assumptions - Bryce Christensen, Booklist O what a world of profit and delight Of power, of honour and omnipotence promised to the studious artisan. Christopher Marlowe, Dr Faustus Between the Renaissance and the Enlightenment, Europe changed out of all recognition and particularly transformative were the ardent quest for knowledge and the astounding discoveries and inventions which resulted from it. The movement of blood round the body; the movement of the earth round the sun; the velocity of falling objects (and, indeed, why objects fall) - these and numerous other mysteries had been solved by scholars in earnest pursuit of scientia. Several keys were on offer to thinkers seeking to unlock the portal of the unknown: Folk religion had roots deep in the pagan past. Its devotees sought the aid of spirits. They had stores of ancient wisdom, particularly relating to herbal remedies. There was the world of wise women, witches, necromancers, potions and incantations. Catholicism had its own magic and its own wisdom. Dogma was enshrined in the collective wisdom of the doctors of the church and the...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
