## MINISCRIP SHORTHAND

Legend Publishing,US, United States, 2008. Paperback. Book Condition: New. Workbook, Student. 224 x 147 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Existing shorthand systems (Gregg, Pitman, Teeline) provide non-alphabetical symbols or outlines to increase the writing speed. A number of writing strokes is significantly reduced and a high speed can be attained. However, a great deal of time must be spent on memorization and retention is difficult if you decide to use Gregg, Pitman, Teeline and similar symbol-based methods. On the other hand, speedwriting methods use alphabet letters and are easier to learn. But they require two or three strokes to write a standard letter and can not match a writing speed attainable by non-alphabetical shorthand. The MiniScript system is non-alphabetical version of the EasyScript method and designed to simplify learning and provide a high writing speed comparable to symbol-based shorthand and. EasyScript was introduced in 1990 and has become a viable alternative in the United States and worldwide for those who prefer to utilize alphabet-based speedwriting. MiniScript employs: a) a proven and popular EasyScript alphabet-based abbreviation methodology that reduces considerably the memorization volume by using a small set of abbreviating rules and b) writing abbreviations with special symbols to attain writing speeds comparable to non-alphabetical shorthand. Applying MiniScript you will need to remember only a list of 9 special symbols representing English alphabet. Symbols from conventional PC keyboard such as period (.), slash (/), comma (,) are used and require little or no training. EasyScript book is not required to study MiniScript. A demo of EasyScript is available at our website.
