Discovery. Book Condition: New. Contents: 1. Eating habits. 2. Culture of honey bee. 3. Culture of silk moth. 4. Culture of lac insect. 5. Insect pests. 6. Insect pests and natural enemies. 7. Biology of minor pests. 8. Biological control. 9. Insecticides. 10. Fungicides. 11. Herbicides. 12. Insect pest management. "The fundamentals of Applied Entomology are presented within the framework of scientific discovery. Researches in entomology have been made almost incredible strides in the past few decades. Consequently, existing concepts of insects biology have been expanded. These have been a revolution indeed in this direction."The text integrates the descriptive, experimental and biochemical approaches into a conceptual framework. All important points are illustrated diagrammatically. The title is not intended to be comprehensive nor could it be at length, but it concentrates as putting across the basic principles of the subject as briefly and lucidly as possible. It does this with the aid of careful selected examples-some recent and other classic of the field and with numerous illustrations. The aim is to enthuse the reader with this active and existing area of research and to lay a solid foundation on which further study of its various facets may be based." (jacket) 314 pp.
