

Nutrient Status Of Maize Growing Areas in Chittoor District of A.P

By Venkata Sagar Kumar Reddy Redyam

LAP Lambert Academic Publishing Jul 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x11 mm. Neuware - Maize has high production potential when compared to any other cereal crop. The productivity of maize is largely dependent on its nutrient management. The crop has high genetic yield potential hence; it is called miracle crop and Queen of cereals . In Andhra Pradesh, though maize is predominantly grown in kharif, irrigated maize is gaining popularity in view of higher productivity. Maize (*Zea mays* L.) is a heavy feeder of nutrients. Soil test based fertilizer application is still a rare practice in this area. Hence, there is a wide variation in fertilizer application by farmers. This leads to either excess or deficiency of the nutrients which might result in nutrient imbalances in the soil. As a consequence the maize yield is lower than the actual yield potential. To stabilize the yields and economy of maize production, balanced nutrition is essential. The uptake of nutrients by a maize crop producing 5 t ha⁻¹ of grain yield was estimated around 105 kg N, 50 kg P₂O₅ and 75 kg K₂O kg ha⁻¹. Keeping the above aspects, Nutrient status of soils in maize growing areas in Chittoor district of Andhra Pradesh was...

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be playful, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
