**A TREATISE ON ENGINEERING FIELD-WORK COMPRISING THE PRACTICE OF SURVEYING, LEVELLING, LAYING OUT WORKS, AND OTHER FIELD OPERATIONS CAMBRIDGE LIBRARY COLLECTION - TECHNOLOGY VOLUME 2**

DOWNLOAD PDF

Cambridge University Press. Paperback. Condition: New. 142 pages. Dimensions: 8.5in. x 5.5in. x 0.3in. In the 1840s, the civil engineer Peter Bruff (1812-1900) designed what was then the largest brick structure in Britain, the 1,000-foot-long Chappel Viaduct in Essex. He went on to become a railway entrepreneur and developer, and was responsible for the creation of the resort town Clacton-on-Sea, where he also designed many of the buildings. In this illustrated guide, first published in 1838 and here reissued in the revised and expanded two-volume second edition of 1840-2, he discusses the theory and practice of surveying (calculating the accurate position of points in the landscape) and levelling (calculating the accurate height of points). Volume 2 covers levelling; Bruff gives a brief overview of the theory, then describes the typical equipment used. By discussing such examples as the levelling of a projected railway route, he explains what information should be recorded, and how to avoid common errors of technique that affect accuracy. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
