Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Principles of Microbiology: A Treatise on Bacteria, Fungi and Protozoa Pathogenic for Domesticated Animals This volume has been prepared as a text-book for veterinary students beginning the study of microbiology. It is not exhaustive but rather elementary in character. In its preparation, the purpose has been to point out the place and role of microorganisms in nature; to give the methods for their study and identification; to indicate the relation of certain species to animal diseases; to give a description of the more important species pathogenic for animals; and a brief discussion of the reaction of the tissues to microbial invasion and the theories of immunity. Each of these topics has a voluminous literature but the undergraduate can familiarize himself with a few of the essential facts and principles only. In recognition of this, the purpose has been to give a few of the more important facts and to explain briefly the essential principles and theories of infection. In order that the volume may be of further aid as a key to the entire subject, numerous references to the literature are given where the student can obtain at first hand the results of original research. Further, a list of text and reference books on the subject is appended. This volume is the outgrowth of a lecture course which has accompanied the laboratory work in bacteriology and protozoology. I have endeavored to choose the material that will be of most help to the student of animal diseases and to avoid as much as possible matters of controversy. I wish to Acknowledge my indebtedness for assistance derived from the various text books, reports and current literature on...
