

Wines Nutritional Power: Vitamins - Minerals - Enzymes - Acids

Filesize: 8.14 MB

Reviews

The most effective pdf i ever read through. I am quite late in start reading this one, but better then never. Its been developed in an exceedingly simple way in fact it is only soon after i finished reading through this pdf by which in fact altered me, modify the way i think.

WINES NUTRITIONAL POWER: VITAMINS - MINERALS - ENZYMES - ACIDS**DOWNLOAD**

Strategic Book Publishing & Rights Agency, LLC. Paperback. Condition: New. 90 pages. Dimensions: 9.0in. x 6.0in. x 0.2in. Wine is the most perfect of all foods, according to Louis Pasteur, and is the closest known substance to blood. Hebrew history records that wine was used for covenants and daily as a water purifier. Wine was the sustaining nutrition hidden in cellars when enemy armies stole the food. Florence Nightingale saved the British Army during the Crimean War when they were losing hundreds of soldiers a day from cholera, typhus, and Brucellosis plagues. Desperate generals finally agreed to let her fifty nurses help. The power of her wine remedy in the water buckets will astound you. In 1938, USDA researcher Agnes Fay Morgan discovered fermentation caused grape juice to create new vitamins, acids, and other nutritional substances; but USDA research was stopped by regulatory agencies claiming wine was alcoholic liquor, and it was not classified as a food. This careless, mislabeled, comingled, confusing, and interchangeable use of the terms wine and liquor has caused the ignorance and rejection of wine as a fermented food product. In the authors next book, Wines Medicinal Power, he investigates the medicinal elements of disease-destroying acids and will present shocking university discoveries that confirm the food-chain power of wine. A J Morris, Jr. , PhD, of Bella Vista, Arkansas, holds an MBA from Dallas Baptist University and his doctorate in higher education administration from the University of North Texas.
