

## Physics of Classical Novae

Filesize: 1.96 MB

### ***Reviews***

*An exceptional ebook and also the typeface applied was intriguing to read through. I have got read and i also am sure that i am going to likely to go through yet again once more in the foreseeable future. I discovered this pdf from my dad and i advised this ebook to find out.*

Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of Colloquium No. 122 of the International Astronomical Union. Held in Madrid, Spain, on 27-30 June 1989 | Satellite observations in various previously unexplored spectral regions have provided a host of data on novae over the last decade. This carefully refereed conference volume is devoted to classical novae and related objects. Around 30 papers discuss observations (basic properties of novae, outbursts, and nebular ejecta), theoretical considerations, and models of observations. In addition the reader will find an introductory review on binary stars by R.P. Kraft and a summary by P. Eggleton of the papers and posters presented at the conference. To help the reader in finding any specific subject or stellar object the volume concludes with a detailed index. | Welcome address.- Cataclysmic variables as binary stars: Then and now.- The long term behaviour of classical old novae.- Classical novae: Properties between outbursts.- Galactic distribution and outburst frequency of classical novae.- Novae in clusters and galaxies.- Strong magnetic fields in nova systems.- Quasi-periodic outburst activity of novae at minimum.- Spin period variations of the white dwarf in FO AQR/H2215-086.- The galactic nova rate.- A possible nova from the IRAS point source catalogue.- Where is nova 1437? - Surprises in the space density of cataclysmic variables.- On the postoutburst far ultraviolet declines of WZ sagittae and V1500 CYGNI.- Spectroscopic observations of the southern old novae CP PUP and V841 OPH.- CP puppis: Another V1500 Cyg?.- The uv luminosity of old novae.- V 1500 Cyg: Slow variability in post-nova stage.- Maximum magnitude vs. rate of decline for novae of the LMC.- On V603 Aql and magnetic novae.- Optical studies of classical novae in outburst.- Chemistry of nova envelopes.- Ultraviolet observations of classical novae in outburst.- Multi-wavelength observations of novae in outburst.- New infrared results...
