# STOCHASTIC MODELLING OF RANDOM VARIABLES

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Application to financial risk valuation | The process of verifying how well a selected and calibrated model represents a certain empirically observed phenomenon is usually referred to as model validation. In areas where empirical phenomena are not directly observable, as in case of financial volatility, the problem of stochastic model validation remains perhaps one of the most elusive though practically relevant problems of the modern applied research. In particular, it is generally...
