

The Biological Standard of Living and the Antebellum Puzzle

Filesize: 1.97 MB

Reviews

A really wonderful book with lucid and perfect reasons. This can be for all who statte there was not a worth reading through. You are going to like how the author write this book.

(Dr. Grady Jacobi DDS)

THE BIOLOGICAL STANDARD OF LIVING AND THE ANTEBELLUM PUZZLE

GRIN Verlag. Paperback. Condition: New. 36 pages. Dimensions: 8.5in. x 5.5in. x 0.1in. Seminar paper from the year 2007 in the subject Economics - Micro-economics, grade: 1, 7, LMU Munich (VWL Lehrstuhl), course: Strategic Factors in the Economic Development of the United States, 8 entries in the bibliography, language: English, abstract: Imagine someone came up to you and asked you: name three aspects that in your opinion are of great significance to a high standard of living, what would you say What determines your perspective towards the standard of living Do you give priority to income and wealth To personal freedom Or to health With regard to our todays society, where most products are being invented in order to make our lives more comfortable, it is interesting how the standard of living can be measured best. The most widely adopted measurement of the material standard of living is GDP per capita adjusted for changes in the price level, called inflation or deflation. Usually, one might guess that through a higher GDP per capita, the income and the personal wealth rises and therefore the standard of living also increases. This nevertheless does not reflect the distribution of income, or the environment that affects health and safety. Moreover, crime, pollution, and congestion - which are for many people negatively correlated with their quality of life - are neither considered. GDP per capita therefore just measures the material standard of living, but a lot of other factors are being ignored. That is the reason why the biological rather than the material standard of living should be contemplated in terms of measuring the quality of life. A second possibility to measure the standard of living is the HDI (Human Development Index). It consists of 13 GDP per capita, 13 life expectancy index, plus 13 education...
