University of Nevada Press, United States, 2009. Hardback. Condition: New. Language: English . Brand New Book. This book presents eleven new stories that are set in and around San Francisco by an award-winning author. The stories in this collection explore those moments when the seemingly fixed coordinates of our lives abruptly give way - when mother love fractures, a faithful husband abandons his family, a conscientious middle-class life implodes, or loyalty demands an excruciating sacrifice. The characters share a fundamental predicament, the struggle to name and embrace some faith that can break their fall. In equal measure, they hunger for and resist this elusive possibility and what it demands of them. The Mechanics of Falling and Other Stories deals with a range of circumstances and relationships, and with characters who must decide what they are willing to risk for the sake of transformation, or for the right to refuse it. The stories trace the effort to traverse the boundaries between one state and another - between conviction and self-doubt, recklessness and despair, resignation and rebellion. And each story propels the reader to imagine what will happen next, to register the unfinished and always precarious quality of every life.
