Createspace Independent Publishing Platform, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This book contains proven steps and strategies on how to identify the cause of your hair loss. One example that is discussed, is badly done perms which can have hair lose its normal elasticity, making it brittle, fragile, and prone to breakage. Other side effects of perm include scalp damage, which can include redness, itching, burning, and peeling. Perm can also stop hair from re-growing, which means some chemicals inhibit new hair growth. Other examples are Thyroid disorders, anemia, chronic illness or the use of certain medications, particularly any form of hormone replacement therapy or contraceptive prescriptions-should be considered a possible cause of hair loss in women. Autoimmune disorders will result in somewhat different, often less dramatic hair loss known as alopecia areata--an inflammatory condition in which hair comes out in clumps or patches. This book will enlighten you on all types of hair lost from chemicals to alopecia and treatment ideas for all types of hair loss. This book will also help you to know and understand the causes of these faults as well as how to correct it. I am delighted to offer you these indispensable tools to help you restore your hair and your health. The information I present here will help you identify the cause of your hair loss and ideally lead you to a doctor for proper treatment for your kind of hair loss, sooner rather than later.
