The power that will thereby be made available for delivery as electric energy will vary with the flow of the canal up to a maximum of 10,000 horsepower at the first and about 17,500 horsepower at the second station. Whatever of this power may be required in connection with the pumping of water to the Yuma mesa and for canal operation or drainage pumps in both the Yuma and Imperial Valleys, should be held available for these purposes. The remainder should be marketed for the joint advantage of the Yuma project and the Imperial Irrigation District, provided, of course, that the Yuma project, or the United States for this project, has contributed to the cost of the power installations. In any event under joint development the power required by the Yuma project and by the Imperial Irrigation District should be...
