

## User-friendly: User Friendly: Workbook and ASP Tutorial (Mixed media product)

By Harry Frank, Steven C. Althoen

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 1994. Mixed media product. Book Condition: New. 277 x 216 mm. Language: English . Brand New Book. This workbook is to accompany Statistics: Concepts and Applications by H. Frank and S. Althoen. It provides tutorial and examples as well as a comprehensive guide to using the computer software package ASP (an IBM disk containing this program is enclosed in the book). Statistics: Concepts and Applications is a classical general statistics text written in modern voice. The authors bring mathematical, theoretical and conceptual integrity to a body of topics and techniques that is appropriate to a first course in statistics and do so in a way that is accessible to students whose mathematical preparation does not go beyond the standard curriculum for college algebra. The informal, conversational prose delivers conceptual richness and advances a quiet subtext of mathematics instruction that achieves a high level of mathematical rigour. The text presents a thorough, step-by-step development of fundamental principles.
