Free Association Books, United Kingdom, 2017. Paperback. Condition: New. Language: English . Brand New Book. Originally published in Hebrew, this book presents the first thorough analysis of Freud s Project for a Scientific Psychology for Neurologists while relating to all its strata (evolutionary, physiological, psychological and linguistic) and deciphering their complex integration. Its conclusions challenge the accepted literature by presenting a re-evaluation of the text s place in the Freudian revolution. Dr. Saul Haimovich, the author of this uncompromising book, provides the reader with a richer and more intellectually stimulating framework than previously available for the interpretation of Freud s work. The book s importance, the outcome of a meticulous reading of Freud s early work, lies in the author s description of Freud s efforts to develop a new scientific paradigm, rooted in his understanding that the mind-body problem and the concept psyche lack content. Together with his *Freud and Psychiatry* (2010), the book marks a further step in the author s over-arching program, having two aims: The first, an analysis of the epistemic (theoretical, technical) and institutional foundations of Freud s commonly accepted model for research and treatment, grounded in the analysand s associations; the second, ultimately replacing that model with Freud s original method, based on study of the analyst s associations and self-analysis as applied in the *Traumdeutung*. Intended for psychoanalysts, philosophers of science, literary critics, Freudians, anti-Freudians, as well as the interested lay reader, this book provides fascinating insights into Freud s early work and its implications for psychoanalysis and its history.
