Excerpt from Notes on a Case of Nasal Caries, Complicated With Meningitis, Successfully Treated by Means of the Surgical Drill: Read Before the American Laryngological Association at the First National Medical Congress, 1888 Mr. M., an intelligent, Well born gentleman, aged thirty one after consulting a number of physicians for relief from a severe nasal disease, and obtaining no satisfaction, finally sought the advice of Dr. Hubbard, of New York, who promptly referred him to me for treatment. The nasal disease for which the patient consulted us had, through neglect and maltreatment, so completely undermined his health and shattered his nerves that it was found necessary to resort to the liberal use of morphine, to enable him to traverse the distance (about thirty miles) in tervening between his home and the city. The symptom most complained of was a severe headache, which had harassed him almost continuously for about five months, and, despite the assiduous use of opiates, he had been able to procure but little rest. The pain in the head was for the most part referred to the temporal region, and...
