CHEMICAL UNIT OPERATION AND EQUIPMENT (UNDER THE GUANGDONG QUALITY CURRICULUM MATERIALS)

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 271 Publisher: South China University of Pub. Date :2010-08-01 version 1. Chen Lanying compiled a chemical unit operation and equipment (quality curriculum materials under the Guangdong Province). introduces the chemical unit operations commonly used in the production process The basic principle of a typical device structure and its use (or design) calculation. Book is divided into upper and lower two. The book include: Introduction. fluid flow. fluid transport machinery. settlement and filtration and fluidization. heat transfer. evaporation. and Appendix; next book include: distillation. absorption. gas-liquid mass transfer equipment. drying and membrane separation. Each chapter is equipped with some examples and exercises. The contents of the book step by step in layman's language. emphasizing the engineering point of view and the actual ability to use; written in simple. popular language. easy to self. Chemical unit operation and equipment (quality curriculum materials under the Guangdong Province) can be used as chemical and related professional institutions of higher learning. Chemical Principles course materials. and has been published with the common chemical unit equipment design. a book supporting the use; also be used as chemical. pharmaceutical. food. environmental protection and other departments engaged in the research. design and production of technical reference books. Contents: 1 Overview 1.2 1.1 distillation of gas-liquid two-component solution. 1.3 balance balance balance of distillation and simple distillation distillation 1.3.2 1.3.1 1.4 distillation simple distillation process principles and operating principles 1.4.2 1.4.1 fine distillation two sub-boiling operation process 1.5 Continuous distillation column calculations 1.5.1 full tower material balance equation 1.5.3 1.5.2 operating line feed thermal conditions (q-line) equation 1.5.4 1.5.5 to determine the appropriate reflux ratio 1.5.6 Calculation of theoretical plate number of layers of several layers...
