Reviews

The publication is easy in read through better to recognize. It usually will not cost too much. You wont feel monotony at whenever you want of the time (that's what catalogs are for concerning when you question me).

Springer. Hardcover. Condition: New. 126 pages. This book discusses the design of neural stimulator systems which are an established treatment methodology for a wide variety of brain disorders such as Parkinson, depression and tinnitus. Whereas many existing books treating neural stimulation focus on one particular design aspect, such as the electrical design of the stimulator, this book uses a multidisciplinary approach, combining the fields of neuroscience, electrophysiology and electrical engineering, to create a thorough understanding of the complete stimulation chain from the stimulation chip down to the neural cell. The authors multidisciplinary approach enables readers to gain new insights into stimulator design, while they provide context by presenting innovative design examples. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Hardcover.
