THE FRACTAL STRUCTURE OF THE UNIVERSE

VDM Verlag Jul 2008, 2008. Taschenbuch. Book Condition: Neu. 223x149x10 mm. Neuware - The fractal dimension of the spatial distribution of galaxies can be characterized by various statistical and topological methods, such as the Two-point Correlation Function, Perimeter-Area, Box Counting, and the Gamma Function. Here we develop a new way to get fractal information, that is the Metric Space Technique (MST). It allows multiple measures to be simultaneously applied for quantitative analysis of any type of structure distribution. All such distributions...

Reviews

The ebook is not difficult to read through better to understand. Indeed, it is playful, continues to be an interesting and amazing literature. I am just easily able to get an enjoyment of studying a created book.

-- **Nikita Tillman**

The most effective ebook I have at any time studied. It can be written in easy words and phrases and not difficult to understand. I am just pleased to let you know that this is the finest publication I have read within my individual lifestyle and could be the finest publication for at any time.

-- **Tania Mosciski**
