

Achieving Business Value in Information Security

By Torsten Kriedt

Diplom.De Okt 2002, 2002. Taschenbuch. Book Condition: Neu. 210x148x7 mm. This item is printed on demand - Print on Demand Titel. Neuware - Diploma Thesis from the year 2001 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, University of Applied Sciences Regensburg (unbekannt), language: English, abstract: Inhaltsangabe:Abstract: The beginning of the 21st century with the fear of the 'Year 2000'-threat (Y2K) became a milestone for the 'Information Age', a term coined for the post-industrial stage of leading countries [] when information and information technologies become the main strategic national resource which results in an avalanche growth of information dependence in all spheres of society and state activities. . In organisations the awareness of the dependence on information has led to corporate initiatives to treat information as an asset, which includes various efforts for its protection. Management trends such as 'knowledge management' have identified 'knowledge sharing' as a new means for achieving competitive advantage, thus promoting information to be disseminated. Due to an ever closer relationship with customers, suppliers and even competitors, organisations have expanded their 'information network' outside of the original boundaries. The dualism of protection of information assets on the one hand and a...
