

## Photocuring in Dentistry

By Makkar, Sameer / Goyal, Meenu

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | In modern dentistry, the worldwide use of resin-based composites continues to increase, and in some countries has entirely replaced mercury amalgams. The use of direct polymer-based restorative materials has changed the way dentistry is performed and perceived. Initially, resin based composites were chemically activated, then, light- activated systems were introduced. The present project is aimed at describing different polymerization lamps and curing modes so that the clinician can efficiently use them for curing and curing should not be these five words for them "and then you light cure". A better understanding of this complex subject is essential to maximize the light output without suffering from any health hazard. | Format: Paperback | Language/Sprache: english | 128 pp.

### Reviews

*It is one of the most popular publications. It really is written in easy words and not difficult to understand. You are going to like how the author writes this book.*

*-- Prof. Evans Balistreri DDS*

*Completely essential go through book. This is for all who state there had not been a worthy of reading through. It is extremely difficult to leave it before concluding, once you begin to read the book.*

*-- Lydia Legros*
