## THE EMBODIED MIND

GRIN Verlag GmbH Apr 2008, 2008. Taschenbuch. Book Condition: Neu. 210x148x6 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2007 in the subject American Studies - Linguistics, printed single-sided, grade: 1,3, University of Bonn (Institut für Anglistik, Amerikanistik und Keltologie), course: Cognitive Linguistics, 20 entries in the bibliography, language: English, abstract: The 2.000 year old dichotomies of mind versus body and inner self versus external world are still ubiquitous in Western spontaneous philosophy (in Gramsci's sense), science and education. However, they cannot be empirically testified. On the contrary, more than thirty years of rich evidence from interdisciplinary cognitive science leave no doubt that the human mind is embodied in our entire organism and embedded in the world. The nature of our everyday sensory (i.e. visual, auditory, haptic, olfactory, gustatory, vestibular) and motoric experience, which is interactive and could be described as organism-environment co-ordination (Johnson & Rohrer 10), constitutes our species-specific view of the world (Evans & Green 45). Moreover it serves as information on the opportunities and costs of acting in the environment (Proffitt 110) and thereby at least indirectly (i.e. via our individual conceptual structures derived from embodied experience of our natural and socio-cultural environment) guides our (linguistic) behaviour. Perception (i.e. processing of information obtained by our sensory system), cognition (i.e. conceptual representation of perceptual input and off-line employment of the concepts), consciousness (i.e. confluence of distinct phenomena such as first-person-perspective and volition) and action do not form clearly divided systems of brain activity but function as continuum of ongoing interaction between our body, mind and ambience. They are not merely contingently in individuals; they have also evolved together. (Rosch & Thompson etc. 173) This paper will sum up the most fundamental findings from the branches of cognitive...
