

## A Laboratory Manual of Metals and Alloys: Volume II

Filesize: 4.29 MB

### **Reviews**

*These kinds of publication is the ideal pdf offered. It generally is not going to expense too much. I am just delighted to let you know that this is actually the very best book i have go through inside my very own life and might be he finest ebook for ever.*

## A LABORATORY MANUAL OF METALS AND ALLOYS: VOLUME II

To read **A Laboratory Manual of Metals and Alloys: Volume II** eBook, remember to refer to the web link listed below and save the ebook or have accessibility to other information which might be relevant to A LABORATORY MANUAL OF METALS AND ALLOYS: VOLUME II ebook.

I.K. International Publishing House Pvt. Ltd., 2011. Paperback. Book Condition: New. Second Edition. 16cm x 24cm. This compendium of twenty laboratory experiments on metals and alloys attempts to provide to students of Science and Engineering an insight about the relationship of the physical, specially mechanical properties of metals with grain structures/ microstructures. In almost all the experiments, therefore, the microstructural investigation is provided. Experiments have also been included on the determination of important mechanical and thermal properties and on the aqueous and atmospheric corrosion of metals. Theoretical background of each experiment has been dealt with in good detail in order to enable the student to understand the underlying principles and to appreciate the significance of the experiments. Information which could not be accommodated in the text of the experiments, has been provided in the form of appendices. These include: reflection microscopy, experimental determination of transition points through cooling curves to get data for plotting phase diagrams, and quenching media for tempering of alloys. In view of the importance of microstructures for some metals and alloys have also been given. This book will be useful to the students of materials chemistry and materials science and students of various engineering courses. It will also be helpful to the students of industrial chemistry, practising engineers in metallurgical and mechanical engineering based industries."
