Low Power Hardware Synthesis from Concurrent Action-Oriented Specifications (Paperback)

By Gaurav Singh, Sandeep Kumar Shukla

Springer-Verlag New York Inc., United States, 2014. Paperback. Condition: New. 2010 ed.. Language: English . Brand New Book ***** Print on Demand *****.Human lives are getting increasingly entangled with technology, especially computing and electronics. At each step we take, especially in a developing world, we are dependent on various gadgets such as cell phones, handheld PDAs, netbooks, medical prosthetic devices, and medical measurement devices (e.g., blood pressure monitors, glucometers). Two important design constraints for such consumer electronics are their form factor and battery life. This translates to the requirements of reduction in the die area and reduced power consumption for the semiconductor chips that go inside these gadgets. Performance is also important, as increasingly sophisticated applications run on these devices, and many of them require fast response time. The form factor of such electronics goods depends not only on the overall area of the chips inside them but also on the packaging, which depends on thermal characteristics. Thermal characteristics in turn depend on peak power signature of the chips. As a result, while the overall energy usage reduction increases battery life, peak power reduction influences the form factor. One more important aspect of these electronic equipments...

Reviews

This book will never be straightforward to start on reading through but quite enjoyable to learn. Better then never, though i am quite late in start reading this one. Your lifestyle span will probably be convert once you complete reading this publication.

-- Dr. Kadin Hane DVM

This publication may be worth purchasing. it was actually writtern quite flawlessly and valuable. I am just happy to tell you that this is actually the very best book i actually have study inside my personal life and can be he best ebook for actually.

-- Frank Nienow
