Date :2009-08. now can tell you is this: So far. the human oral cavity. there are nearly 300 kinds of diseases. Oral and maxillofacial diseases account for more than half. 40 kinds of oral mucosal disease. and dental only one third. Oral microbiologists tell us that the human mouth at least 300 species of microorganisms. but also said more than 500 kinds of. Last 10 years. British and American scientists through collaborative research. but also in the human mouth bacteria found in the new. can now be further defined to tell you. the human oral cavity. there are 600 kinds of microorganisms in 1 ml of saliva in the 100 million bacteria. total bacteria in the human mouth of the population even more than global. and most bacteria are harmless or beneficial bacteria. Only a small part of a pathogenic role. not only can cause periodontal disease and caries. but also can cause lung. blood and skin infections. Almost every week in the mouth can be a new species discovered. Future research task is to study not only the harmful bacteria in the mouth in the role. but also to study their beneficial effects. If you only know a few teeth in the mouth. even lost a few. can not stop eating and drinking. so you do not to pay attention to whether the oral hygiene. oral hygiene also pay attention to not pay attention to the relationship is no big deal. even if full mouth dental are not. people still alive. what the going gets hard. soft can still eat. if you think so. it would have nothing to say. However....
