Pages Number: 391 Language: Chinese. Free curve and surface modeling technology from the application point of view discusses the free curve and surface modeling in CAD / CAM method. Differential geometry based on Saass surface. Bei Qiai method. and the NURBS method. scattered point interpolation surface. intersection and smooth. and expected to use the free type of deformation in the CAD / CAM systems of 21 century. partial differential equations. and energy optimization The new modeling method and wavelet technology. Freedom of curves and surfaces modeling technology fully reflects the achievements of 25 years engaged in teaching and research in the field of freedom of curves and surfaces. The book is 18 chapters. Chapter I to Chapter III of the basic part; Chapter IV describes the principle of of Koons construct cross-border continuous free-form surface; and CHAPTER for Bei Qiai method; Chapter VI to Chapter discusses the theory and application of the B-spline method. Chapter XI to Chapter XV of the research results; of the details of emphasis on the B-spline basis function generation. nature and its impact on the shape of curves and surfaces. NURBS surfaces in turn discusses the triangular domain surface. scattered point interpolation surface. free type deformation. surface modeling of partial differential equations and energy law. emphasizing the principle of these methods. the algorithm steps and the scope of application; Chapter 16 discusses the wavelet technology in multi-resolution free of curves and surfaces. smoothing and data compression in the application. The last two chapters discusses the curve surface intersection and smoothing. Free curve and surface modeling technology available to colleges and universities. aerospace. automobiles. ships. computers. machinery. mold. geology. meteorology. medical and industrial modeling. and...
