Squares And Sharps: The Science, Psychology Philosophy of Gambling (Hardback)

By Joseph Buchdahl

Oldcastle Books Ltd, United Kingdom, 2016. Hardback. Condition: New. Language: English . Brand New Book. People have been gambling, in one form or another, for as long as history itself. Why? Money, entertainment, escape and a desire to win are all traditional explanations. Arguably, however, these are secondary considerations to a higher order purpose: a craving for control. Gambling offers a means of gaining authority over the unknown, granting us a sense of control over uncertainty. Almost always that sense is illusionary gambling, including betting and investing, is essentially random yet for many it is nonetheless profoundly rewarding. This book attempts to explore the reasons why. Along the way, it examines the science of probability and uncertainty, why gambling is often condemned, the difference between expectation and utility, the irrationality of human beings, evolutionary perspectives on gambling, luck and skill, market efficiency and the wisdom of crowds, why winners take all, cheating, and why the process matters more than the outcome.

Reviews

Basically no terms to clarify. It is actually written in basic terms rather than confusing. I found out this ebook from my dad and I suggested this book to find out.

-- Elinore Vandervort

If you need to add benefit, a must buy book. I could possibly comprehend every little thing out of this composed e pdf. I am quickly could get a enjoyment of looking at a composed book.
