Not illustrated. 1916 Excerpt: .doubting the necessity for efficient school medical inspection, and more particularly, the establishment of eye clinics in the public school system, will find much food for thought in the report of the Bureau of Child Hygiene covering school medical inspection in New York City during 1919. This report, prepared by the Director, Dr. S. Josephine Baker, and the Assistant Director, Dr. Jacob Sobel, may be found in the September issue of the Monthly Bulletin of the Department of Health, New York City. Contagious eye and skin diseases are grouped under one heading, showing 237,437 cases; of these, 1,675 are cases of trachoma, 12,457 cases of acute conjunctivitis, and 128 cases of follicular conjunctivitis. Of 248,978 children examined, 17,895 were found to be suffering from defects in vision, of which 8,787 were corrected by proper refraction and glasses. The report goes on to state: The Blind and...

Reviews

This publication can be really worth a go through, and a lot better than other. It is actually written in straightforward words and phrases instead of confusing. I discovered this pdf from my dad and i suggested this publication to learn.

-- Jackeline Rippin

A high quality book and also the font employed was intriguing to read. I was able to comprehend every thing out of this created e book. You wont really feel monotony at whenever you want of the time (that's what catalogues are for concerning should you check with me).

-- Prof. Johnson Cole Sr.
