GAO noted that: (1) the Service followed most of its key requirements for acquiring a site in Lancaster in 1991 prior to obtaining approval for the proposed Antelope Valley project, although some requirements were vague; (2) one major exception was that review and approval of the proposed project justification and alternatives by the Headquarters Capital Investment Committee did not take place prior to the advance site acquisition in Lancaster, as required by Service policies; (3) Service guidance was unclear because it required that alternatives be identified and analyzed before a project could qualify for advance site acquisition, but it did not clearly state the type or depth of analysis required; (4) at the time of the Lancaster site acquisition, the analysis to support the decision was incomplete; (5) more detailed analyses were still under development; (6) GAO could not determine from available documentation why the alternative to construct a new facility in Lancaster was preferred over other alternatives that had been proposed or why various alternatives were not considered viable; (7) the Lancaster site purchased for 6.5 million in 1991 has remained unused since that time due to the Service's failure to decide how and when it will resolve the long-standing problems that the proposed Antelope Valley project was to address; (8) continuing negative effects have resulted from the incomplete status of the project for almost 10 years; (9) project approval and funding of the project remain uncertain...
