

AppleScript For Dummies (2nd Revised edition)

By Tom Trinko

John Wiley & Sons Inc. Paperback. Book Condition: new. BRAND NEW, AppleScript For Dummies (2nd Revised edition), Tom Trinko, Spending a little time with this book can save lots of time on the computer! AppleScript is object-oriented programming language used to write script files to automate tasks and customize applications for the Mac. AppleScript can automate much of what you do with your Mac computer, saving time and helping you be more productive. Businesses and individuals frequently use it for: * Batch processing* File conversion and manipulation* Performing tasks at specified times* Transferring information between databases and other applications* Creating automated workflows by linking the actions of multiple applications to perform a series of related tasks Written by Tom Trinko, a Mac man since 1984, and author of articles for MacTutor and MacTech Journal, AppleScript For Dummies, 2nd Edition covers everything from the basics to more advanced stuff, with information on: * Finding and installing AppleScript* Using AppleScript to automate tasks in programs such as Word, Excel, FileMaker Pro, and the Mac OS Finder* Arranging applications to work together to accomplish complex tasks* Controlling applications that aren't even scriptable* Taking advantage of tools that make composing AppleScript programs easy and fun* Finding additional...

Reviews

This book is definitely worth acquiring. I have go through and so i am certain that i will likely to read through again again in the future. Its been printed in an exceptionally basic way in fact it is only after i finished reading this publication in which actually altered me, change the way in my opinion.

-- Andres Bashirian

Comprehensive guide for publication fanatics. This really is for all who statte there had not been a well worth reading through. I discovered this ebook from my dad and i encouraged this book to find out.
