Date :2008-3-1. The book details about JavaScript as a language in all aspects of hybrid characteristics. including procedural. object-oriented. functional and dynamic language features and so. in a dynamic functional language features has a particularly detailed about. One of the main efforts of this book is the atomic decomposition of these languages. try mixing them together now in the process and methods. By the complexity of a single language from the characteristics of the restoration process. the reader can understand the nature of language. and the endless stream of language features behind the truth. The main purpose of writing this book is based on a simple form of the language to talk about the nature of language and its applications. This book describes in detail the process through the implementation of this framework to construct a JavaScript extension framework approach. and fully extend the framework described in the various design trade-offs. so you can study as a learning computer programming language reference. to show how the real system classical theory to achieve a variety of programming paradigms.
