paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment.Paperback Pages Number: 368 since 1989. after the advent of the first edition of the textbook. computer network technology has taken place a lot of changes. While it is the fourth version. but the editor was adapted to make the teaching materials and the development of network technology is still quite difficult. New concepts and protocols in the textbook are others proposed. but the editor of the textbook. but also requires careful selection. Very limited space. should be the basic principle clear. Compared to the previous version. this version of the biggest changes is the more prominent the TCP / IP protocol suite and Internet-based applications. also removed some of the main line farther away from the TCP / IP. are quite outdated secondary content. The new version of textbooks is more clearly elaborate on the key issues. for example. stop waiting for the agreement. the structure and the routing mechanism of the router. subnet mask and CIDR. TCP congestion control. The new additions are: the key performance indicators of the computer network. link layer framing the concept of Virtual Private Network (VPN) and network address translation NAT. system calls and application programming interface API. real-time traffic data protocol RTP and RTCP. etc. Not the length of the textbook over-expansion. although some content is also relatively new. such as MPLS. etc. in this version has also been deleted. Gradually expanded the scope of application of IP technology. the length of the ATM technology is properly compressed some. The new version there are three appendices. Appendix A is the most important English abbreviations. Appendix B references and URLs. and Appendix C is a part of the exercise answer or prompt the...
