Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from **A Guide to the Common Diatoms at Water Pollution Surveillance System Stations: June, 1966** Plankton studies were initiated in 1957 under the direction of Dr. Clarence Taizwell and Dr. C. Mervin Palmer. The studies which they initiated were a part of the Public Health Service program to collect basic data on the quality of water in major waterways. In the beginning plankton studies were limited to sedgwick-rafter counts of phytoplankton and Zooplankton. As the phytoplankton populations at the various stations were characterized, the dominant role of the diatoms became apparent, and preparations were begun for more intensive work with these forms. After the early species identifications were made through consultations or correspondence with Dr. Matthew Hohn, Dr. Charles Reimer, Dr. Friedrich Hustedt, and Dr. G. D. Hanna, routine diatom species identification and enumeration were inaugurated in 1959 by Dr. Louis G. Williams who was in charge of plankton studies from September 1958 to December 1962. Dr. Cornelius I. Weber assumed responsibility for the plankton studies in September 1963. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.](#)
