

Ionic Channels in Cells and Model Systems (Paperback)

Filesize: 4.14 MB

Reviews

It is an incredible ebook that we actually have ever study. This is certainly for all those who statte that there had not been a worthy of looking at. I am just pleased to inform you that this is the very best publication i have got go through during my individual daily life and can be he best ebook for possibly.

(Clarabelle Marvin)

IONIC CHANNELS IN CELLS AND MODEL SYSTEMS (PAPERBACK)

Springer-Verlag New York Inc., United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This book is based on a series of lectures for a course on ionic channels held in Santiago, Chile, on November 17-20, 1984. It is intended as a tutorial guide on the properties, function, modulation, and reconstitution of ionic channels, and it should be accessible to graduate students taking their first steps in this field. In the presentation there has been a deliberate emphasis on the specific methodologies used toward the understanding of the workings and function of channels. Thus, in the first section, we learn to read single-channel records: how to interpret them in the theoretical frame of kinetic models, which information can be extracted from gating currents in relation to the closing and opening processes, and how ion transport through an open channel can be explained in terms of fluctuating energy barriers. The importance of assessing unequivocally the origin and purity of membrane preparations and the use of membrane vesicles and optical techniques in the study of ionic channels are also discussed in this section. The patch-clamp technique has made it possible to study ion channels in a variety of different cells and tissues not amenable to more conventional electrophysiological methods. The second section, therefore, deals with the use of this technique in the characterization of ionic channels in different types of cells, ranging from plant protoplasts to photoreceptors. Softcover reprint of the original 1st ed. 1986.
