## Quality management for component based software system

By Jha, Shambhu

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Component Based Software Quality Models and Metrics | Software communities are striving for techniques and approaches that could improve developer s productivity; reduce time-to-market, excellent performance and produce systems that are flexible, scalable, secure, and robust. Only possible solution of this problem is component-based software engineering, which has generated tremendous interest in software communities. Unfortunately, the quality attributes of the final component based system, such as its performance, scalability or reliability, are not easy to determine. For this reasons, the component-based approach, is difficult to utilize in domains in which quality attributes are of primary concern. This dissertation proposes quality model for CBSD that defines a set of quality attributes for the effective evaluation of COTS components. Further, this dissertation also suggests few necessary guidelines and proposes some relevant metrics applicable to it, which after proper quantification and validation may help guiding risk and quality management of CBSD. This dissertation may help the research scholar s software, practitioners and students in better understanding of more relevant metrics applicable to quality management of CBSD | Format: Paperback | Language/Sprache: english | 64 pp.

### Reviews

*A fresh e book with an all new viewpoint. It is really simplistic but unexpected situations in the 50 % from the book. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- Dawn Hane

*Completely among the finest ebook I actually have possibly go through. It is really basic but excitement from the 50 percent in the book. I am quickly could possibly get a pleasure of looking at a published ebook.*

-- Javon Okuneva I
