

Leading Issues in Is Evaluation (Paperback)

By -

Acpi, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Volume 2 of Leading Issues in ICT Evaluation Research is a compilation of nine academic articles originally published in EJISE between 2010 and 2015. The articles were identified through a meta-analysis of information systems evaluation papers, undertaken by Professor Shaun Pather, editor of the Electronic Journal for Information Systems Evaluation (The analysis was based on the degree to which each articles advances the ICT evaluation body of knowledge with special emphasis on issues typical of the current inter-networked era. Thus, these articles, when considered as a whole, reflect the leading issues in the evaluation of Information Systems over the past five years, and are therefore invaluable to both the research and the business communities. This book further provides a global view of ICT evaluation with research perspectives highlighted from eight different countries. Each paper is accompanied by an insightful editorial commentary to highlight the importance of each article. These therefore set an important framework for future research in the forthcoming era.

Reviews

These kinds of publication is the greatest pdf available. Better then never, though i am quite late in start reading this one. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Lorena Streich

It becomes an awesome pdf that I have actually read through. It really is full of knowledge and wisdom You may like how the writer compose this book.

-- Amanda Gleichner
